Greetings

We take pleasure in presenting to the trade, this, our Blue Book for the spring of 1928. No business can have the consistent yearly growth that we are experiencing unless it is retaining its old trade—and old customers are not retained unless they are being pleased. And so a real satisfaction comes to us in observing the relation with so many of our old buyers—for this is the most striking proof that we are pleasing them.

You are certain to find in this list many items that will sell readily to your trade and that will yield a good profit. We are so organized that we can serve you promptly and efficiently. We will appreciate your valued patronage.

**Volck, Effective, Safe and Easy to Use**

Controlling plant pests successfully demands a spray that will not only effectively control pests such as Red Spider, Mealy Bug, Scale, White Fly, and Aphis, but at the same time be safe to use on tender plants. Safety is particularly necessary on tender greenhouse and garden plants. Volck answers these requirements and fewer applications will get results.

Volck is also a pleasant spray to handle and mixes easily with water.

The Good & Reese Co.,
Springfield, Ohio.

Gentlemen:

I want to say that I never saw a more wonderful shipment of Roses—each came in perfect order, and the plants were of extra good size and health. I am looking forward to see a beautiful Rose garden that I have just set out, and I am ever so much obliged to you for the selection of plants you shipped and the order in which they came.

It is probable that I shall be in the market for more of your stocks.

Again thanking you, I am,

Yours very truly,

Frank M. Olmsted,
505 E. 8th St.,
Landscape Architect.
We are pleased to inform our customers that we have again this year our usual quantity of high-grade plants. For forty years we have been recognized as rose headquarters, and in endeavoring to supply the trade with the finest American grown plants, our sales have for many years far exceeded those of any other grower. Good & Reese supply will be over four million plants this year—but we anticipate the demand to far exceed the supply. Our roses are grown under glass, on their own roots, and can be shipped at your planting time. Being summer propagated, winter-rested they break forth into growth with renewed vitality. Early orders are mutually advantageous—place yours now—it assures you of complete selection, quantity and no disappointment.

Roses of Recent Introduction

JOHN RUSSELL (H. T.)—A very fine dark crimson rose with blooms of a good shape and stiff, strong petals. Mr. Easlea, who saw it growing in the raiser's nursery, tells us it is quite one of the best roses of recent years.

JOSEPHINE VESTAL (H. T.)—A Rose of attractive coloring. Color is so difficult to describe that any description can only be a partial one, and gives but a faint idea of the superb beauty and richness of the shades. It might be described as salmon-flesh, tinted rose, with a touch of yellow at the base. Its fragrance fills the room. Ranks one of the best of the garden Roses. Hardy in almost all localities.

JUNE BOYD (H. T.)—Long-pointed bud, flower large, double high centered very lasting. Salmon carmine yellow at base, opens to bright peach-blossom pink, continuous bloomer.

JUSTINA (H. T.)—Has a very large long-pointed bud, petals recurring on the opening flowers, color a beautiful salmon-pink, tinted apricot and gold, delightfully fragrant. A very strong vigorous grower. It might well be described as a glorified Madame Butterfly but more highly colored.

LADY DIXON HARTLAND (H. T.)—Bud long-pointed; flower opens well, high center, fragrant, deepest salmon at center shading to pale pink on outer petals. Abundant, continuous bloomer.

LA CHAMPAGNE (H. T.)—A meritorious and distinct variety of strong, robust habit, with large, long buds of beautiful shape, which develop into good full bloom; color bright carmine, shading to yellow with apricot at center and peach-blossom reflex and yellow base.

MABEL TURNER (H. T.)—A fairly vigorous rose, with well-shaped faintly scented blooms, carried on long, stiff stems. The color is a bright pink, shaded white, reminding one of the old rose "La France." Foliage olive-green and fairly free of mildew. It should be useful as a bedding variety.

MISS LOLITA ARMOUR (H. T.)—Burnished buds and creamy copper flowers, with reddish tinge.

MME. MERCIER MOLIN (H. T.)—Bud long-pointed; flowers large, full; fiery red tinted with crimson, edges of petals slightly tinted with rosy-pink; borne on long, strong stem, sweet fragrance. Vigorous very free bloomer.

**TEDDY JUNIOR** (The Fern for Every Household.)—The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about five times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot.

**JOHN WANAMAKER** ("The Wanamaker Boston Fern")—A "sport" from Nephrolepis Scholzeli, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholzeli, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower; making an abundance of fronds, and is quite distinct from any other Nephrolepis.

**ROOSEVELT**—The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants.

**WHITMANII** (The Ostrich Plume Fern.)—The well-known fluffly leaved fern; a popular florists’ variety.

**WHITMANII COMPACTA** ("The Parlor Fern")—This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description.

**SCHOLZELI** ("The Crested Fern")—The fronds, like Scottii, stand erect, and with a graceful arch form a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow.

**BOSTONIENSIS** ("The Boston Fern")—A variety that needs no description. Still the most popular of all varieties.

**GOODI** ("The Baby’s Breath Fern.")—(Good & Reese.)—This Fern is splendid to use for fern dish planting. The finest foliage of all the ferns. Fronds very flufly. A well-grown specimen is in great demand. It is of easy culture.

**SCOTTII** ("The Newport Fern.")—It is a rapid grower and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety.
